

Streamline Your Turn Around

Gerlinger's Newly Redesigned Tube Bundle Rotator (TBR)

1. Deliver to Cleaning

2. Tube Bundle Roller Rotates Exchanger for Complete Cleaning at the Cleaning Pad

3. Return for Installation

Based on the design and function input from an industry leading refinery, we developed the original concept for the Bundle Pallet Rotator (BPR) a decade ago. Building on the original innovative design's incredible success, we recently completed the redesign of the refined and newly renamed Tube Bundle Rotator (TBR).

- New scissor type width adjustment for roller assemblies using a hydraulic cylinder
- Adjustable position, removable roller assemblies with quick connects for hydraulics
- Components are painted-optional corrosion resistant galvanizing available
- Full length drip pans with drain ports
- Adjustable to handle bundles from 8' to 21' 5" length and up to 5' 6" diameter
- (3) Ratchet straps
- (2) Rubber bumper wheels on ends to keep bundle securely on the pallet
- Guards for motor shafts and bearing
- Dual drive motor arrangement with torque-arm mounting
- Maintenance free pillow block bearings
